## PROFILE

I bring four years of experience in building full stack applications. I craft UIs from scratch, maintain them, leverage backend frameworks, and implement architectures. I've worked as a freelancer and participated in projects with both small teams and large organizations.

## EXPERIENCE

### NIQ | JavaScript Survey Programmer

2024 - present

- Extended the survey tool (**Verint**) with server-side technologies (**Node.js**, **Python**)
- Developed custom **JavaScript** solutions to enhance interactivity and user experience.
- Used **CSS** libraries like **Bootstrap** and **Tailwind** for faster development and design consistency.
- Used **GitHub** and **VSCode** to develop and maintain a library of functions, standardizing code.
- Managed project tasks in **Jira**, ensuring clear tracking of progress and deadlines.

### E-borealis | Front End Web Developer

2022 - 2024

- Migrated high traffic websites from a **CMS** to a **PHP** framework (**Codeigniter**).
- Built controllers, models, and views, and integrated them with **PostgreSQL**, **Redis** and **RESTful APIs**.
- Developed and maintained the front end using **HTML**, **CSS**, **JavaScript**, and libraries.
- Used **Docker** for containerization of the development environment of both front and back ends.
- Collaborated in an **Agile** environment, contributing to sprint planning and team coordination.
- Applied **SEO** strategies on the front end to enhance rankings.

### Freelancer | Full Stack Web Developer — UI Design

2020 - present

- Developed full stack apps with **Django** and **Ruby on Rails**.
- Built dynamic front end applications with **React**.
- Created lightweight, easily maintainable static sites using **Jekyll**.
- Managed version control with **Git** and **GitHub** to track changes and collaborate efficiently.
- Managed deployment using CI/CD tools like **GitHub Actions**, and cloud platforms like **Heroku**.
- Made architecture decisions, selecting the right technologies and frameworks for each project.

## EDUCATION

### 42 Lisbon | Software Development

2022 - 2025

### Le Wagon Berlin | Full Stack Web Development

2020

## LANGUAGES

Spanish. Native

English. C1 | Portuguese and French. B2

## FEATURED SKILLS

Object-Oriented Programming in **C++**  
Data Structures & Algorithms  
Imperative programming in **C**  
Concurrent & network programming  
Systems administration

## ACADEMIC PROJECTS

A non-blocking **Nginx** like HTTP server written in **C++**  
Several **C++** programs focusing on general **OOP** principles and their applications  
A command line interface program similar to **Bash** featuring basic shell functionalities

## PERSONAL SKILLS

ADAPTABILITY | TIME MANAGEMENT | PERSEVERANCE | TEAMWORK
